Peer to Peer

## RPAY TAKES THE CRYPTO EXPERIENCE BEYOND BITCOINS AND PAYMENT GATEWAYS

### Privacy

There is no central server, no personal information is captured and no data mining. Data cannot be stolen or sold. Data is distributed across the nodes with redundancy and context-based dynamic encryption.

### No Fee or restriction

For most users, products, and services it's free for both buyers and sellers with the payment method of your choice including R Tokens, or other crypto currencies. No middleman, no commissions, no fees.

### Integrated RPAY/BTC Wallet

Lowering barriers to entry for crypto users through integrated wallets and friendly UI is its key adoption factor.

### RPAY MALL

Our Phase II would provide a whole lot of products available in different categories including electronics, home appliances, mobile phones, and clothing with good cash back.

### Investment Growth

See your wallet money grow. With the ever increasing retail industry globally, the use and value of RPAY and R Tokens will see an increasing trend.

### Products and Services

RPAY shall embrace all products/services be it any recharges, travel bookings, event bookings, e-commerce and service payments, etc.

Our platform processes the payments directly, without middlemen by using any currency of your choice converted into RTKs.

The smart contract ensures that the money goes to the seller only when the buyer confirms the delivery. So, the buyer makes the payment once his/her order arrives which makes it more convenient for both parties and increases trustworthiness. RPAY combines unparalleled financial and retail markets' leadership with world-class technologists across multiple fields in one of the fastest growing fin-tech companies in the world. Our platform is aimed to be the only distributed ledger platform to have been developed according to the production requirement of the world's largest financial institutions, in order to ensure security and transparency. The traditional retail system has its own problems of payment hacks, cumbersome processing, etc.

RPAY is a pioneering tool to allow consumers and merchants to leverage the power of cryptocurrency in their everyday life, without having deep knowledge about blockchain or any crypto technology. RPAY is a revolutionary mechanism to transact and pay for retail products, e-commerce and all other consumer and professional services through seamless payment gateway at the point of sale between users through Crypto using a unified and recognized payment system called R Tokens.

Our Team comprises of people from a diverse background including technology, retail, banking, marketing, security, and Blockchain, with a combined experience of over 200 years and spanning 4 continents across the world. Our team is growing continuously and you can track the same on our company website.

We want people to be able to "make more of their money" and "live the dream". RPAY is the Next Big Change. Join the Change movement at our ICO on this **24<sup>th</sup> January 2018** at [rpay.io](http://rpay.io)

## How does RPAY Work?

You will get R Tokens in exchange for your Bitcoins or Ethereum in your crypto wallet which can be used for making payments for various goods, services, e-commerce besides Investment in a Fast, easy, secure manner globally.

RPAY will separate itself from the crowd as being the only company offering decentralized e-Commerce marketplace, being built using blockchain technology, with the opportunity to being the first to market and monetize and operate on the scale through its own community of buyers and sellers.
